Circular Letter No.4398
8 April 2021

To: All IMO Members
Intergovernmental organizations
Non-governmental organizations in consultative status

Subject: **Global Integrated Shipping Information System (GISIS)
New module on Crew Change and Repatriation of Seafarers**

1 Following the outbreak of the COVID-19 pandemic, major industry representatives developed the *Recommended framework of protocols for ensuring safe ship crew changes and travel during the coronavirus (COVID-19) pandemic*, the current version of which was circulated by means of Circular Letter No.4204/Add.14/Rev.1, to facilitate ship crew changes in ports during the pandemic and encouraging Governments and national authorities to provide information on their requirements to that aim.

2 The Maritime Safety Committee, at its second extraordinary session (16 to 21 September 2020), adopted resolution MSC.473(ES.2) on *Recommended action to facilitate ship crew change, access to medical care and seafarer travel during the COVID-19 pandemic*, and invited Member States and relevant national authorities to designate a National Focal Point on crew change and repatriation of seafarers, to coordinate action at national level, and to inform the Secretary-General accordingly so that Member States could be advised for the purpose of coordination.

3 The importance of the aforementioned Recommended framework of protocols was subsequently recognized, and its application encouraged, by the Maritime Safety Committee, at its 102nd session (4 to 11 November 2020) by means of MSC.1/Circ.1636 on *Industry recommended framework of protocols for ensuring safe ship crew changes and travel during the coronavirus (COVID-19) pandemic*.

4 In this connection, MSC 102 also requested the Secretariat to develop a new GISIS module for the dissemination of information provided by Member States regarding ports that facilitate crew changes, including information on the designation of National Focal Points on crew change and repatriation of seafarers.

5 The Secretariat is pleased to announce that the new module on Crew Change and Repatriation of Seafarers is now available on GISIS, for the notification and dissemination of information on ports that facilitate crew changes, as well as National Focal Points on crew change and repatriation of seafarers, as provided by Member States. Since the module is now operational, the current MSC.7/Circ.1 series will be discontinued and Member States are requested to enter relevant information directly in the new module.

6 Information on National Focal Points on crew change and repatriation of seafarers that has already been provided by Member States and circulated by means of the MSC.7/Circ.1 series has been transferred to the new module.

7 Guidance for the use of the module is set out in the annex. Any questions regarding the module should be directed to the following email address: gisis@imo.org

After entering all information, click "Submit" button.
